

INSENSITIVE MUNITIONS

It is a munition's ability to withstand impact, shock and heat which makes the difference between an incident and a catastrophe. The only way to obtain knowledge about the sensitivity of your products is to let them face worst-case scenarios and record every reaction.

This is what we do.

We are the shortest road to absolute truth.

TEST. ENHANCE. CONTROL.
INSENSITIVE MUNITIONS

Don't learn safety by accident

Insensitive Munitions is all about the safety of the soldier in the field of duty. Therefore all IM testing has to be 100% accurate with no exceptions. Not a single one.

Bofors Test Center is an independent private company with the experience and resources required to establish a complete and fully accurate IM signature on competitive terms. We can assess which tests are necessary and how they should be performed. We perform them and measure, film and record every event in detail. We assess the results and provide complete reports. If there is a safety hazard hidden inside a product, we will find it. Every time.

FULL RANGE

Our comprehensive range of tests covers all aspects of IM testing:

- Bullet impact
- Fragment impact
- Shaped charge jet impact
- Slow cook-off
- Fast cook-off
- Sympathetic reaction

BENEFITS

The benefits of IM testing are obvious: improved safety and enhanced logistics. Bofors Test Center's experienced staff, cutting-edge equipment and flexible organisation guarantee cost-efficient and reliable testing. 100% accurate. Every time.
