

DEFEATING THE IMPOSSIBLE SINCE 1886

Since 1886, we have been taking ordnance to the very edge to find out exactly where its limits lie - and each time we have documented the process down to the last detail.

Because what's hell for your product is heaven for your investment.

TEST. ENHANCE. CONTROL.

Welcome to Hell

In 1886, Bofors established a firing range in order to test guns. More than a century later, Bofors Test Center is a state-of-the-art testing facility for both military and civilian products. We have all the resources required to verify that your product is designed to meet its technical specifications.

SERVICES

We provide a wide and flexible range of services from testing and product development support to destruction, including:

- Performance and qualification testing
- Insensitive munitions testing
- Lifetime extension
- Environmental testing
- Unmanned Aircraft Systems
- Wind tunnel testing
- Transport classification
- Destruction of explosives
- Demilitarization

WELCOME TO HEAVEN

We aim to exceed your expectations. Our personnel have unrivalled experience and expertise in our field of operation. Our high-tech equipment has the capability to capture every game-changing event, however small it may be. Furthermore, we are 100% flexible and always try to find the best solution for your needs, no matter of how tight the time schedule is or how complex the test might be. This combination of experienced staff, high-tech facilities and flexibility makes Bofors Test Center a world-leader. Every time. All the time.
